

reliaFIL LC

Advanced Healthcare Ltd.
ahl.uk.com

Description

reliaFIL LC is a universal, light-cured, nano-hybrid composite filling material offering fluoride release and recharge. **reliaFIL LC** is indicated for use on posterior and anterior teeth in classes I, II, III, IV, and V cavities; wedge-shaped defects and root caries; direct laminate veneers; core build-ups; and repair of fractured laminate veneer and porcelain. **reliaFIL LC** has a flexural strength of 120 MPa and a radiopacity twice that of natural dentin. **reliaFIL LC** comes in 0.25 g capsules in 20 count boxes or 4 g syringes in 12 shades: A1, A2, A3, A3.5, A4, A20, A30, B1, B2, C2, BW, and INC (incisal). Curing time is 30 seconds with a halogen lamp or 10 seconds with a powerful LED light. **reliaFIL LC** was evaluated by 28 consultants in 770 uses. This universal composite received an 88% clinical rating.

Consultants' Comments

"Its continual fluoride release make it an ideal choice for patients at high risk of caries."

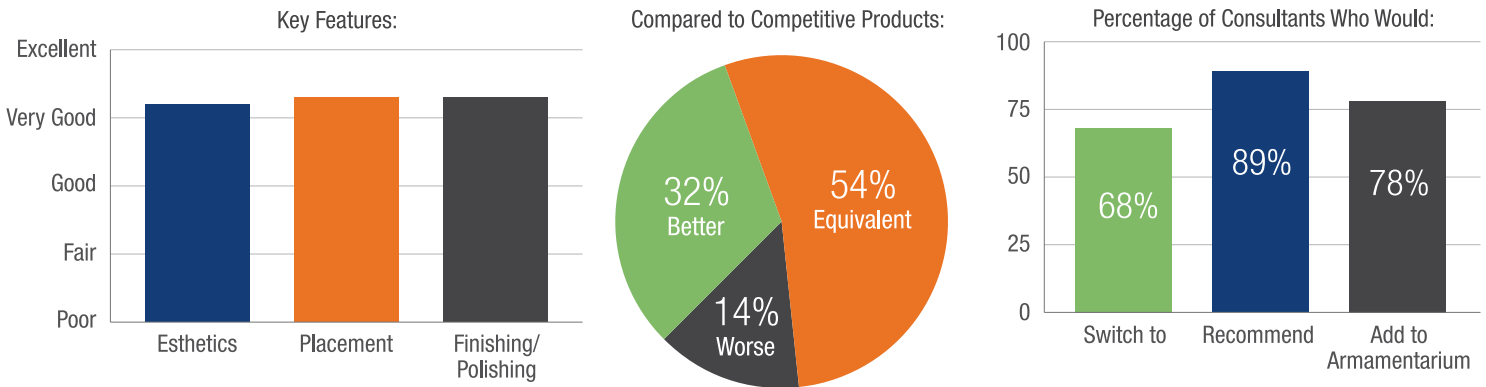

"Very radiopaque."

"It blends very well with the tooth, making the margins imperceptible."

Product Features

reliaFIL LC is a smooth composite that dispenses easily and is sculptable with minimal sticking to instruments. The potential for fluoride release and recharge is appealing for use in patients with high

caries risk. Radiographically, **reliaFIL LC** is readily apparent. Restorations finished to a smooth surface and polished to a high gloss. The opaque shades are useful for masking dark dentin or filling deep cavities, and the standard shades blend well with the surrounding enamel.
